LEGAL MANUFACTURING, LLC REBRANDS, INCREASING FOCUS ON NIB BATTLEWORN® NICKEL BORON SERVICES

Atlanta, GA, January 11, 2018 - Legal Manufacturing, LLC, an industry leader in nickel boron plating, recently rebranded and unveiled a redesigned website. Formerly Tactical Firearm Solutions, operations will continue uninterrupted as Legal Manufacturing, LLC. The decision to retire the Tactical Firearms Solution brand and website will minimize brand confusion and assist in clarity of our offered services. The new www.LegalManufacturing.com highlights the company's focus on nickel boron plating, including the popular NIB BATTLEWORN®, MOD 1 and MOD 2 series of firearms, and Cerekote services. The craftsmen of Legal Manufacturing, LLC look forward to the streamlined operations this rebranding offers and will continue to offer industry leading plating and coating services to new and existing clientele.

About Legal Manufacturing, LLC

Legal Manufacturing, LLC is a producer of NIB BATTLEWORN® plating, a low-observable, patent-pending nickel-boron plating treatment that offers superior scratch and wear characteristics while simultaneously reducing friction to aluminum, steel, and titanium firearm surfaces. NIB BATTLEWORN® creates a smooth and uniform plating barrier, increases the surface hardness of the plated part to over 70 Rockwell hardness, and produces a surface that is superior to competing plating systems.
